## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-25 are rejected under 35 U.S.C. 102(a) as being anticipated by Cernea (U.S. Pat. No. 6,50,146).

Regarding claim 13, Cernea discloses a system for reducing power in memory system comprising: a) a RAM buffer (figure 1, shift registers 109, 114, 119 and 122); b) a MRAM (nonvolatile memory can be MRAM, FRAM, Flash or other type, col. 3, lines 35+); c) wherein the buffer stores information (shift register is used for storing information); d) wherein the information stored in the RAM buffer is written to the MRAM such that all storage cells connected to a selected wordline in the MRAM are written (col. 4, lines 27+).

Regarding claims 14-16, Cernea discloses the system having all limitation as in claim 13 wherein the RAM buffer is an SRAM buffer; is a DRAM buffer; is a array of flip-flops (buffer circuit can be implementing by flip-flop circuit or any other type; col. 4, lines 10+).

Claims 17-20, 21-24 and 25 contain the similar limitation as previously discussed in claims 13-16. Therefore, they are analyzed as previously discussed with respect to claims 13-16.

Regarding claims 1-12, the apparatus as previously discussed in claims 13-16 would be performed the method as claimed. Therefore, they are analyzed as previously discussed with respect to apparatus claims 13-16.
